STARVIEW™

Semi-Automatic Skin Packaging System SP Series

The *SP Series* equipment is extremely versatile. These systems are ideal to wrap display items, products for storage, and fragile goods for shipping.

The cycle is completely automatic, and also includes an automatic **film cut-off system.** The operator simply loads the skin board with the product, then activates the start button. Once the product has been skin-packed, the board is manually pulled out and the film is automatically severed with a hot wire. Manual infeed and outfeed tables are included as standard features.

All motions and functions on the machines are coordinated by PLC control panel with an **operator interface touch screen** (includes built-in diagnostics and password protection).

Heater: Impulse Heating System with Quartz Tubular Elements
Structure: Heavy gauge steel tube construction.

◀ MSP-1218 table Top Model

This table-top model is both practical and economical, making it convenient for any location; store, home, office, etc.

Standard Features:

- Vacuum Box Size 12” x 18”
- Electricals: 120V-15 amps
- Vacuum System: Turbine
- Impulse Heater with Silica Tubular Elements
- Heater/Vacuum Timer
- Roll Bearing Support for 20” Film
- No Compressed Air required

SPECIFICATIONS

Model		SP-1824	SP-2430	SP-2436	SP-3036	SP-3048
Maximum Card Size		18” x 24”	24” x 30”	24” x 36”	30” x 36”	30” x 48”
Maximum Product Height		10”				
Working Pressure		80 PSI				
Air Consumption CF/Cycle		0.37			0.60	
Electricals		220/3/60				
Amps		32	45	63	70	85
Vacuum Turbine (100 CFM each)		1	2		3	4
Dimensions	Length (including infeed/outfeed tables)	83”	101”	119”		153”
	Width	32”	38”		44”	
	Working Height	40”				
	Weight (approx)	450 lbs	500 lbs	550 lbs	600 lbs	650 lbs

Custom Sizes are Quoted on Request.

◀ SP/IR Series

The *SP/IR Series* machines have the same basic features and sizes as the *SP Series*, with the exception of the heating system. This *Series* features an automatic **Retractable Heater System** with **Ceramic Infrared** or **Radiant Panels**, regulated by zone control(s) to provide precise heat distribution. This heating system increases productivity even with heavy film.

Standard Features include:

- Vacuum System using Turbines
- Film Cut-off System
- Manual infeed and Outfeed Tables

Optional Features available:

- Blister Forming Cycle with Vacuum Pump and Tank
- Automatic Clamping Frame Open/Close
- Automatic Template Infeed System (as per ASP Series)
